

Supporting the Science of Self-Healing

September 1, 2021

Issue 28 BRMI E-Journal

- Scottsdale Conference/Workshop October 1st-3rd
- **Issues Surrounding Graphene Oxide in the Pfizer mRNA Covid 19 Formulation**- James Odell, OMD, ND, L. Ac
- **Our Lymphatic System: Much More Than Just Drainage and Waste Transport** – Ralf Oettmeier, MD
- **Frequency Therapy in Music** James Odell, OMD, ND, L.Ac.
- Book Review: **Ravenous**– Otto Warburg, The Nazis, and the Search for The Cancer- Diet Connection by Sam Apple.
- **Photodynamic Therapy (PDT) and Low-Level Light Therapy (LLLT)** – Marlene Siegel, DMV
- **24 Hour News Cycles: Is Your Mind at Risk? Homotoxicology and Conditions of Mind Control - Mary Coyle, DIHom**
- Video Recommendations: **The Minds of Men** and **Graphene Skies**
- **Tips for Analyzing Medical Articles**, revised by James Odell, OMD, ND, L. Ac

Dear Friend,

Welcome to our 28th BRMI E-Journal.

We are delighted to report that the BRMI continues to exponentially grow in both website and social media content and viewership. We sincerely thank everyone for liking us on social media and for all your comments and article submissions. Our website information increases daily and has evolved into an extensive database and open forum of uncensored, empirical evidence-based information.

The BRMI workshop/conference on October 1st, 2nd, and 3rd is filling up fast and [today is the last day to take advantage of our discounted room rates!](#) It will be hosted at the beautiful Sonesta Suites in Scottsdale, AZ. Travel to Scottsdale is one of the most affordable destinations, and the hotel rooms are spacious suites. The hotel provides guests with free breakfast and happy hour in the evening. BRMI is providing lunch on Friday and Saturday and has allotted extra time for lunch on Sunday to explore the many nearby restaurants. We have limited attendee number to no more than 60 so sign up soon to assure your place in this unique event. Dr. Ralf Oettmeier, MD from the Alpstein Clinic, Switzerland will be our lead presenter. Also presenting are Sharon Stills, NMD, Gerry Curatola, DMD, Kelly Kennedy, LMT, Ian Kennedy, Sargent Goodchild, Moira Lo Bianco and myself. This workshop will instruct participants on numerous diagnostic and therapeutic procedures such as neural therapy, procaine therapy, apitherapy (honeybee venom therapy), Korean sujok (hand foot) acupuncture/acupressure, toxicity detection and detoxification techniques, lymphatic drainage techniques, sound therapy, hormone therapy, anamnesis and body examination approaches, heart rate variability assessment, basic applied kinesiology technique, contact regulation thermography and biological dentistry. There will be panel discussions on coronavirus vaccine issues and plenty of time to visit vendors.

It is imperative for practitioners of medicine, students, and researchers involved in the medical field, to regularly take part in medical conferences, to not only enjoy steady growth in their careers but to also expand their knowledge base and gain more skills. Most successful medical practitioners attest to the fact that medical conferences helped them transform their careers and learn about modern therapeutic approaches that they would never have heard about if not for attending conferences. Not only will this conference expand knowledge and skills, but will be a unique opportunity to stand eye to eye with like-minded colleagues and share stories and ideas about current affairs. For more information, topics, and schedule [click here](#).

There has been a dramatic increase in medical censorship, particularly around the COVID inoculations over the last three months. Censorship is worldwide, and personal freedoms have tragically seen a notable decline. In some countries, inoculation mandates are in force, though people are protesting and pushing back. Our medical freedoms have never been more in jeopardy. Multiple governments along with their Big Tech 'partners' have been deleting social media accounts and censoring any information and evidence that seems to contradict their own 'point of view'. This is often labeled as "fake news", regardless of how credible or evidence based it might be. Thousands of doctors, scientists, and journalists have been de-platformed or shadow-banned on internet sites and social media and silenced from expressing vital information and concerns about specific health care policies. Topics particularly censored are coronavirus inoculation safety issues, inoculated individuals transmitting pathogenic spike proteins to the unvaccinated (contagious vaccinosis), valuable nutritional and bioregulatory immune therapies, climate geoengineering causing weather disruptions, 5-G radiation dangers, and numerous other environmental pollution issues. This decline of access to freedom of information and medical informed consent is exponentially growing, creating an existential crisis for society.

Many of us deep down know that there is something very wrong taking place. Even world-renown doctors and scientists are no longer allowed to express a different narrative or opinion anymore, no matter how many PhD's they have behind their name. Medical workers are no longer allowed to discuss facts publicly without being censored, dismissed from their careers, or even losing their medical license. Globally, many no longer have the freedom to make their own medical choices ("My body, my choice" no longer applies). Rather, we have entered a period reminiscent of the powerful propaganda and intimidation campaigns that immediately preceded the most distressing dictatorships (and genocides) of the past century.

Inaccurate and fear mongering articles are being constantly propagated by the mainstream media primarily sponsored by the pharmaceutical industry. An international process of editorial standardization has delivered unprecedented news coverage of the monopolized deceptive message:

The pandemic threatens the survival of all humanity
There is no therapy to cure the COVID sick
It is necessary to confine the whole population, and
The delivery will come only from a vaccine.

As outlandish as these untruthful messages are, many people unwittingly believe them!

The maPinastsret almss muedsia appears to have hypnotized the masses. Because it is becoming harder to know what to believe, it is important to do our due diligence and research the sources of news articles to know if they are truly based in science. Unfortunately, many news articles do not list their research source, but some do. For those articles with sources, I have written [Science: How Do I Know What to Believe? Tips for Analyzing Medical Articles](#).

We at BRMI stand committed to posting an open, unbiased news forum on our website from which our readers may stay informed on current medical topics, some that are being heavily censored. Our News Section includes an abundant resource of recent articles and videos from around the world on current topics related to medical freedom, preventive and therapeutic bioregulatory health, immunology, epidemiology and more. We strive to be a trusted and informed source for our readers.

Because BRMI is a non-commercial, non-profit institute, this empowers us to present uncensored, open forum information and referenced commentaries, and in turn, enlighten our viewers to more than one medical viewpoint. As always, we all should do our own due diligence to research medical topics by looking at all sides of the issue and not one narrative. If there is newsworthy information relevant to the science of self-healing that you would like to share, [please contact me](#).

Our feature articles in this edition are diverse in topics. They include [Issues Surrounding Graphene Oxide in the Pfizer mRNA Covid 19 Formulation](#); Frequency Therapy in Music; [Our Lymphatic System](#) by Ralf Oettmeier, MD; [Photodynamic Therapy \(PDT\) and Low-Level Light Therapy \(LLLT\)](#) by Marlene Siegel, DVM, and [24 Hour News Cycles: Is Your Mind at Risk? Homotoxicology and Conditions of Mind Control](#), by Mary Coyle DIHom.

In this edition, our Book Review highlights [Ravenous](#), by Sam Apple. This fascinating biography tells the incredible background story of Otto Warburg, a Nobel Prize-winning biochemist. Mr. Apple chronicles how Dr. Warburg, who was of Jewish descent and a homosexual, survived the Third Reich in a posh Berlin suburb, and further how his theories of metabolic cancer cells have proven fruitful for certain bioregulatory cancer therapies. For more information on [Otto Warburg](#) visit our Pioneers of Bioregulatory Medicine section.

Please stay tuned to the ongoing weekly BRMI podcasts hosted by Dr. Sharon Stills, NMD. Dr. Stills has now completed over 47 exciting and informative podcast interviews. All the episodes are superb, yet I want to call special attention to the recent [Sargent Goodchild's podcast](#) interview. Over the past 22 years Sargent Goodchild has been helping parents recover the health of their children diagnosed with autism, learning disabilities, attachment and bonding disorders, among others, using a process known as neurological reorganization and development. Sarge will be presenting at our conference in Scottsdale.

Our featured videos this edition are: [The Minds of Men](#) and [Graphene Skies](#).

We hope you benefit from our varied resources. Comments and submissions to our e-Journal are always welcome and appreciated. We maintain an active YouTube channel, [Facebook](#) page, [LinkedIn](#), [Instagram](#), and [GAB](#) and post evidence-based articles and news events daily. Feel free to interact with us via social media - or contact me directly at jpmmodell@brmi.online.

We thank you for your interest in bioregulatory medicine.

James Odell, ND, OMD, L.Ac.
BRMI Executive/Medical Director

Issues Surrounding Graphene Oxide in the Pfizer mRNA Covid 19 Formulation

James P.M. Odell, OMD, ND, L.Ac.

Aside from the pathogenic spike protein, recently it has been reported by two Spanish researchers that nanoparticles of graphene oxide (GO) are a component in some analyzed vials of the Pfizer mRNA inoculation.

Our Lymphatic System: Much More Than Just Drainage and Waste Transport

Dr. Ralf Oettmeier, Alpstein Clinic AG, Gais, Switzerland

Although its importance and presence, our lymphatic system is neglected by conventional medicine. It not only forms the drainage and evacuation system, but together with the immune cells and primary and secondary lymphatic organs it is the main carrier of our immunocompetence.

Frequency Therapy in Music

James P.M. Odell, OMD, ND, L.Ac.

Science has proven that everything in the universe vibrates and resonates with a distinct unique frequency. A singer can break a glass by singing at a certain pitch. The frequency of that tone matches the natural frequency of the glass, shattering it. This is an example of resonance. Resonance is a phenomenon that occurs when a given system is driven by another vibrating system or external force to oscillate with greater amplitude at a specific preferential frequency.

Recommended Book: *Ravenous* by Sam Apple

In *Ravenous*, Sam Apple tells the incredible story of how Otto Warburg, a Nobel Prize-winning biochemist, and a homosexual of Jewish descent, survived the Third Reich in a posh Berlin suburb, and how his theories of metabolic cancer cells may yet hold the key to finding a cure for this epidemic disease of our time. Warburg was commonly considered in his day as one of the most brilliant and influential biochemists of the twentieth century, a man whose research was integral to humanity's understanding of cancer.

PhotoDynamic Therapy (PDT) and Low Level Light Therapy (LLLT)

By Dr. Marlene Siegal

All mammals are light beings, designed to take in various wavelengths of light in order for the biological pathways to function optimally. In this context, light is a nutrient for the body!

24 Hour News Cycles: Is Your Mind at Risk? Homotoxicology and Conditions of Mind Control

Mary Coyle, DIHom

Mainstream media's chronic and controlled 24/7 bombardment of fear and uncertainty is relentless. The recurrent headline lately primarily focuses on the Sars-CoV-2 vaccines - how they save lives, create herd immunity, and that the more people who roll up their sleeves and get the jab, the sooner we can all return to normal.

[Read more>>](#)

"THE MINDS OF MEN is a 3+ year investigation into the experimentation, art, and practice of social engineering and mind control during the Cold War — a mind-bending journey into the past that gives startling insight into the world we are living in today."

"What aren't we being told? Is the highly toxic and controversial element graphene being seeded into our skies as part of the ongoing covert climate intervention operations? Is climate modification the only motive behind the elements being utilized for atmospheric aerosol spraying programs?"

Science: How Do I Know What to Believe? Tips for Analyzing Medical Articles

James P.M. Odell, OMD, ND, L.Ac.

When reading a medical article, it is important to look to the research source that the authors quote to support their conclusions. Sometimes the research says something entirely different from the conclusion of the article.
